BEAM Virtual Playground at Big Time Trampoline Fun Centre in Arvada, Colorado

14th July 2014

Big Time Trampoline Fun Centre in Arvada, Colorado now offers a bonus feature to young guests: the BEAM Virtual Playground.

At Big Time, a Metro Denver indoor trampoline park and family fun center, numerous activities are included with admission: the facility covers 27,000 square feet and includes mazes, rope swings, basketball hoops, 50 ft trampolines, pool, obstacle courses and more.

Now access to the BEAM motion-activated gaming system is also included with admission.

The **Big Time** management first saw the BEAM at a local mall, and were intrigued.

Operations Manager and “Big Time Mom” **Kristi Haselgren** explained: “At Big Time we consistently try to offer a different variety of games and activities for all ages; this game fits in perfectly for us.”

Although they chose the BEAM with children under seven in mind, they soon discovered it appeals to all ages.

“A lot of the parents and kids have never seen anything like it before. They love to get out there and play.”

EyeClick’s inventive **BEAM** products transform floors, walls and tables into interactive gaming surfaces with games and educational activities, activated by movement rather than with fragile controllers.
