## Jungle Java Kids Wild for BEAM

5th July 2011

**Jungle Java play center has installed BEAM interactive gaming system at their newest location in Clinton Township, Michigan. Orca Coast Playground and Theme Magic Solutions brought EyeClick on board for the project to add a unique high-tech activity to the play center. The jungle**

**theme comes to life with a magical forest design and exotic animal motifs. In addition to BEAM, Jungle Java also has a sports court, slides, a rope bridge, and even a laser maze.**

BEAM turns any indoor area into a full blown virtual playground. It is based on a highly advanced gaming platform with motion activated games that everyone can play with their entire body. Multiple players can run, twist, and dance, using their hands and feet to activate sounds and colorful graphics projected on the floor. BEAM is the perfect activity for Jungle Java as they put families' health and safety first. There are no parts to touch or trip on so parents can relax and watch their kids play in a safe and clean environment.

**Bill Dunbar**, Owner of Orca Coast Playground and Theme Magic Solutions shared, "We are thrilled to have had the opportunity of contracting EyeClick on a recent project in Detroit Michigan for a long time client of ours Jungle Java. This was Jungle Java's fourth successful Michigan location and the only location with such an advanced play system and other attractions. They were responsive and detail orientated when it came time to apply their magic and did so fluidly and effectively."

### **About EyeClick**

EyeClick Ltd. ([www.eyeclick.com](http://www.eyeclick.com)) specializes in creating inventive products that transform designated spaces into magical experiences. EyeClick has helped leading brands, from Samsung and Volvo to NASA and GE, transform their floors, walls and window areas into spectacular interactive displays that leave a long-lasting impression on visitors. EyeClick gives designers, hospitals, event planners, retailers, media companies and other organizations the ability to showcase rich interactive digital content in public spaces, including family entertainment centers, medical centers, museums, malls, airports and chain stores.
